Batent No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

ITILE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REPERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR PILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

US-10-055-412B-27

Sequence 27, Application US/10055412B

Sequence 27, Application US/10055412B

Publication No. US20030059861A1

GENERAL INFORMATION:

APPLICAMY: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0058

CURRENT PAPLICATION NUMBER: US/10/055,412B

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/09/193,562

PRIOR APPLICATION NUMBER: US/09/193,562

PRIOR APPLICATION NUMBER: US/60/065,922

NUMBER OF SEQ ID NOS: 47

                                                                                                                                                                                                                                                                                                                                                                                                                                                US-09-224-110-8

Sequence 8 Application US/09224110

Sequence 8 Application US/09224110

Patent No. 6337195

GENERAL INFORMATION:
APPLICANT: Yu, Guo-Liang
APPLICANT: Rosen, Craig

TITLE OF INVENTION: Colon Specific Genes and Proteins
NUMBER OF SEQUENCES: 24

CORRESPONDENCE ADDRESS:
ADDRESSEE: Carella, Byrne, Bain, Gilfillan, Cecchi,
ADDRESSEE: Stewart & Olstein
STREET: 6 Becker Farm Road

CITY: Roseland
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS

Patent No. 65/6434

GENERAL INFORMATION:
APPLICANT: Magainin Pharmaceuticals, Inc.
TITLE OF INVENTION: Asthma-Associated Factors as Targets for Treating
TITLE OF INVENTION: Atopic Allergies, Including Asthma and Related
TITLE OF INVENTION: Disorders
FILE REFERENCE: 36870-5073-WO
CURRENT APPLICATION UNMBER: US/09/623,624

CURRENT FILING DATE: 2000-09-06
PRIOR APPLICATION NUMBER: PCT/US99/04703
                                                                                                                                                                                                                                                                                                                                                   Sequence 27, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFRENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR FILING DATE: 1998-11-17

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

Sequence 1066 Application US/09833263

Patent No. US20020110547A1

GENERAL INFORMATION:

APPLICANT: Wang, Aijun

APPLICANT: Stolk, John A.

APPLICANT: Meagher, Madeleine J.

APPLICANT: Meagher, Madeleine D.

APPLICANT: Stolk, John A.

APPLICANT: MAGENCH MAGNING FOR IMMUNOTHERAPY AND

TITLE OF INVENTION: DIAGNOSIS OF COLON CANCER AND METHODS FOR THEIR USE

FILER REFERENCE: 21012.1 471C12

CURRENT APPLICATION NUMBER: US/09/833, 263

CURRENT FILING DATE: 2001-04-10

NUMBER OF SEQ ID NOS: 1093

SOFTWARE: FastSEQ for Windows Version 3.0

SEQ ID NO 1066

LENGTH: 914

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 2, 1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  62
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 28, Application US/09193562D

Sequence 28, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

APPLICANT: Bauli, Benedicht U.

TITLE OF INVENTION: Nacleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 914
